HEN you get up in the morning and just before going to bed at night brush your teeth with lukewarm water and Ribbon Dental Cream. Do not brush the teeth straight across. The outside of the upper teeth should be brushed downward from the gums; the lower teeth upward. Clean the inside of your teeth next to your tongue -in the same way. The part of the teeth used for chewing food (the grinding surfaces) should be brushed in all directions. After each meal use a soft quill toothpick or floss silk to remove bits of food from between the teeth. Decay causes the teeth to ache, so by preventing decay you prevent pain. The best way to stop decay is to keep the teeth clean. Go to the dentist at least once every six months. Have him remove stains, and fill cavities so that decay can no longer continue. Then twice-a-day care of your teeth will keep them sound.

Ribbon Dental Cream is so delicious that you can get your children to brush their teeth without urging. It has thus solved one nursery problem.

On receipt of this coupon and a letter stating that a child is a prize winner (as per the official list) in the Baby Contest conducted this week, under the auspices of the City Health Department, we will send free a large size tube of Ribbon Dental Cream. To all others who write us a letter enclosing this coupon (not filled out) with 4 cents in stamps, we will send a generous trial size of the delicious Ribbon Dental Cream.
